PROFESSIONAL SUMMARY

Digital Systems & Web Developer with a Business Computing background and hands-on experience planning, building, integrating and deploying more than four complex digital systems. Project experience includes learning management systems, point-of-sale systems, e-commerce, custom content management, payment gateway integration and a React Native POS APK. Able to translate business requirements into system flows, DFDs, ERDs, database structures, admin workflows and responsive user interfaces, with ownership from planning through testing and live deployment.

CORE COMPETENCIES

Web Development | Systems Analysis | LMS & POS Platforms | E-commerce & CMS | Database Design | Payment Gateway Integration | API Integration | CRM Workflows | Responsive UI | Deployment & Technical Operations

PROFESSIONAL EXPERIENCE

ARENA EDU VENTURES (M) SDN. BHD. | Senawang, Negeri Sembilan

Data and System Expert | October 2024 - February 2026

- Managed business websites, landing pages, CRM operations, databases, customer and student data flows, automation, receipt workflows and payment-related technical setup as an independent technical function.
- Translated operational requirements into system structures, admin processes and practical digital workflows that supported day-to-day business activities.
- Configured and used Trustwired CRM to manage customer data, follow-up workflows and operational processes.
- Built and maintained digital pages and internal solutions, while handling testing, troubleshooting, system improvements and technical support.
- Managed domain, hosting, DNS and SSL configuration, and supported payment and registration data monitoring for live operations.

SELECTED TECHNICAL PROJECTS

MYTRIX LMS | Multi-Provider Learning Management System

Independently built a learning platform for course, learner and assessment management, with tokenised video, dynamic watermarking, provider and student portals, quizzes, assignments and e-certificates.

MYTRIX Lite | POS & Online Ordering Platform

Built a connected POS and online ordering platform with multi-location workflows, custom domains, payment integration and a React Native APK.

Mawerkz | Motorcycle E-Commerce Platform

Built the official Malossi Malaysia dealer e-commerce platform with a product CMS, motorcycle fitment selector, category filtering, checkout and CHIP payment integration.

META Oil & Gas | Industry Training Platform

Built a training course platform covering programme discovery, registration, CHIP payment, course CMS, payment dashboard and enrolment tracking.

NEXA Academy | Adult English Learning Platform

Built the public website, campaign pages, registration and payment flow, with course delivery through MYTRIX LMS.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, responsive UI, React Native

Backend & Integration: PHP, Node.js, API integration, authentication flows, CHIP payment gateway

Database & Analysis: MySQL, PostgreSQL, DFD, ERD, database structure, data management, reporting flow

Platforms: WordPress, custom CMS, Trustwired CRM, LMS, POS, e-commerce

Deployment: cPanel, Cloudflare, domain and DNS configuration, SSL setup, testing and debugging

Development Approach: requirements analysis, system flow planning, AI-assisted development, configuration, validation and deployment

EDUCATION

Bachelor of Information Systems (Hons.) Business Computing

Universiti Teknologi MARA (UiTM), Kuala Terengganu | May 2019 - August 2023

Final Year Project: INFOMAX Inventory Management System (AIMS), an independently developed stock tracking system for item records, stock movement and inventory status.
